

# THE GLEICHEN CALL

VOLUME XXX NO. 17

GLEICHEN, ALBERTA, WEDNESDAY JULY 14, 1937

SUBSCRIPTION \$2.00 PER YEAR

## BOOSTS GLEICHEN PRESSURE IRRIGATION SYSTEM

By Miss Freda MacCallum

Gleichen boasts the ownership of the only irrigation system of its kind in Canada. This pipe system of irrigation has through seven years of trial proved a wonderful success. The disastrous results which might have been, if this system had not been used is classed in Gleichen as an unhappy topic. Other systems had been tried previously but only the pipe system has proved successful.

The system has caused little or no trouble, and though it was expensive to install, it may already be said to have paid for itself; the expenditure for maintenance and repairs has been comparatively nil.

The benefits are numerous. Along with the unestimable value of garden it has also become a pleasing town to the eye. To someone entering it from the north it would give the impression that he was entering a land of prosperous and promising fruits from one of despair and desolation. Sharp contrast is seen between the gardens in the town and those in the reserve, which lack the irrigation. It seems impossible that one-half mile from town grass is burnt to a frizzle and crops are ruined practically beyond repair.

For an example of its value, from one strawberry patch, a resident of the town picked some four hundred boxes of strawberries. The boxes used were similar to those used in the stores. Raspberry canes, tomato plants and asparagus tips are classed among the other luxuries enjoyed in the full by the fortunate Gleichenites. A few years ago it was deemed impossible to ripen strawberries or to netatoes in one's garden.

A horticultural society has been formed and every year certain people are elected to judge both gardens and vegetable gardens, and prizes are awarded to the successful competitors. No hard feeling is caused because the judges are chosen from the neighborhood. Experiments are put in effect and some are met with great success. Many of the towns people have tried to grow plum, apple peach trees; also current, Saskatoon bushes, and many favorable result have been obtained.

The irrigation lake which is situated to the north and east of the town has become a grand resort for the children to spend many happy hours swimming, and indeed many grown ups spend a great deal of time there.

The large shady trees which have encouraged the settlement of birds in the town make a wonderful place to sit and read during the hot hours of the afternoon and evenings.

Indeed with the beautiful vegetable crop, one gathers in the early fall, we can sit at ease while winter's snows and winds whistle and blow around the corners of the house; knowing that due to Gleichen's irrigation system our cellar is full of vegetables.

## THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan."

The drought consumes us. There on high the hills are parched, the streams are dry. The drought consumes us. Still I strive.

And will not leave while I survive. Chinese poem about 900 B.C. from the Shi King collection of Confucius. Devastating droughts, as we can perceive from this ancient Chinese classic, is no new thing.

Steadfast striving against the difficulties of drought, too, it seems, is not new, for it has been the common rule in all ages with those who till the furrowed face of the land.

For six, in some places eight, long dry dreary years, the farmers of southern Saskatchewan have demonstrated to the world their determination to strive. Each spring, with gradually diminishing resources, these courageous people, in keeping with the ancient spirit as shown in the Chinese classical poem, have seeded and cultivated the land with faith and hope.

Unfortunately to survive in farming requires more than faith and hope. Material resources which cost money are vital necessities too.

## News Items of Local Interest

Saturday afternoon heavy showers fell north and west of town. Those farmers who were fortunate to receive the rain are jubilant.

J. A. Renaud had the misfortune to get his foot crushed while working with a tractor. He is now able to get around with the aid of a cane.

Miss Wilda Smithstead and Raymond Menard arrived home from a short holiday in Saskatchewan, the home of Miss Smithstead. They report having had a grand time.

Miss Marie Desjardine accompanied with Miss Evelyn Peterson and her brother Henry of Cluny, left Saturday for Sylvan Lake, where they plan to spend a week holidaying.

Dr. Windsor has returned from his trip east. Dr. Windsor accompanied Miss A. Ledrew to Brantford, Ont. Miss Ledrew was recently transferred from the Indian Hospital here to a hospital in Brantford.

Mrs. B. Oliver has returned home after attending the Cardston Golden Jubilee. We regret to learn of the loss of her brother, W. R. Carlson, while she was there. Death was caused from injuries received in an accident.

Mrs. Vivian McEann has been accepted as teacher of the Living Springs School, some seven miles northeast of Gleichen. She is also attending summer school in Calgary in preparation for her new position.

Mrs. J. E. Lester stated on Sunday last during the past few weeks she had disposed of over 400 boxes of strawberries from her garden. Those who have time should take a look at her garden and see the strawberries and plants as they are a sight to be proud of.

Cecil Birch has moved to Calgary where he has a job with the Western Steel Works. Cecil has for sometime past been employed in L. Michael's tinshop and will be greatly missed by customers who want things in a hurry. All join in wishing Cecil the best of luck.

In the dry area many have now come to the end of their material resources. Let us hope that these splendid farmers—these most courageous Canadian citizens—may be saved not only for Western Canada but for Saskatchewan itself, by being re-established somehow among fellow farmers in known good rainfall areas of the province.

The following factors have tended to raise prices: Worst drought in history of Western Canada may produce lowest yield per acre on record. Rust damaging U.S.A. winter wheat crop. Rust spots appearing in U.S.A. and Canadian spring wheat crop. Evidence money inflation beginning to have effect in raising commodity prices in general. Fear of war in Occidental and Oriental countries.

Following factors have tended to lower prices: European countries using substitutes for wheat in bread. World demands for wheat decline as prices advance. Larger wheat acreage expected in Argentina. U.S. private wheat estimates well maintained. Winter wheat and rye harvest begins in Europe. Exportable wheat surplus expected in Roumania. Algerian harvest under way. Fig crop larger in Greece.

## GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.

Mrs. H. Birch, choir leader.

Miss Jean Farquharson, pianist.

Services: Arrowwood draught in broad noon, Gleichen 7:30 p.m.

Subject: The Eighth Beatitude.

In this beatitude we are told about the kind of treatment a true Christian will receive in the world, and history has pretty thoroughly vindicated Paul's words that, "all who will live Godly shall suffer persecution". This warning side of persecution however is that the greater the persecution the longer and purer has the Christian Church become and this is likely to be the case at all times.

Tom Downey, son of Mr. and Mrs. P. Downey left last week for the east where he will meet his prospective Peter who has a job ready for him when he arrives. Tom was well liked in Gleichen and his many friends were sorry to see him leave; but all join in wishing him the best of luck in his new position.

Town Engineer Lester assisted by Bert Robinson have been busy for the past few days grading the streets. This was a good idea. This afternoon, many former Gleichen ball players will be in town and the neat street will give them a most favorable impression of the old town.

Misses Margaret Dafeo and Irene Young left for Calgary last week, where they plan to holiday for a time. They are going into camp with Captain Mrs. E. Swain and her troop at Calgary. Mrs. Swain was formerly captain of the troop in Gleichen and it was at her request that the girls are to spend a week in the city.

Our eminent townman, Emil Griesbach was in the parade in Calgary last week. This was announced over the air and The Christian Science Monitor, Boston had the following to say: "In the parade, D. Loxam of Calgary displayed on his Red River cart a banner with the legend, Pioneer Emil Griesbach from Gleichen, 6 miles to the east, stood up in his cart to wave greetings." It takes Mr. Griesbach to keep Gleichen in the public eye all over the continent.

The Ladies Social Circle met last Wednesday afternoon at the home of Mrs. W. McKeever. Roll call was answered by "Something About Women's Vacations." The ladies got together and did some real useful work, preparing wool for a while, then spent the remainder of the afternoon in amusements. The three guests sponsored by Mrs. O. E. Calkins were enjoyed by all. The prizes winners were Mrs. R. Burns, Mrs. J. A. McArthur and Miss B. McPherson. Lunch was served by the hostess and her assistants. The Circle was pleased to have quite a number of visitors present. The next meeting will be held at the home of Mrs. O. E. Calkins on July 14th.

## LADIES SOCIAL CREDIT GROUP REGULAR SESSION

The Meadowbrook Ladies Social Credit Group was very cordially welcomed by Mrs. F. McPhee last Thursday afternoon, July 8th.

Mrs. Edith Gostick was to have been the guest speaker but was unable to attend due to previous engagements.

The Group expressed regret over the continued illness of Mrs. Bert Lay. Flowers were sent and several members have been to see her. Correspondence and business was dealt with after which the meeting adjourned. A very dainty lunch was served by the hostess.

Mrs. Neil McMillan will be hostess to the Group on July 22nd when a program of sports for the children under the patronage of the sports committee, will be carried out.

## OBITUARY

WILLIAM WALLACE SMITH

Mr. W. W. Smith a resident of Gleichen for several years passed away in Bassano suddenly last week from a heart attack. Mr. Smith was formerly superintendent of the Crown Lumber Co. retiring from that position he took charge of the company's yard here. He was a very active member of the Board of Trade and also took an interest in the Boy Scout movement. Mr. Smith was also a member of the Masonic order. After leaving Gleichen he was moved to Delta where he resided for a short time, being moved by his company to take charge of the Crown Lumber business in Bassano. Mr. Smith is survived by his wife and four children: Wallace, Marion, Lorna and Ruth, the latter is with the staff of the Blackfoot Indian Hospital. The funeral took place in Bassano.

## FARM WOMEN COMPLETE PLANS FOR ANNUAL PICNIC

Mrs. O. E. Calkins was hostess to the U.F.W.A. meeting last Thursday with 14 members present. Roll call being answered by Vilat I Would like my Children to be.

Picnic lunch was discussed and lots of goodies were promised.

Much discussion took place about sending a delegate to Woman's Rest Week or General Farm Woman's Week at Olds. It was decided to send the oldest paid up member, Mrs. J. C. Buckley and Mrs. A. Wilson being chosen.

The sick committee reported Mrs. Wilson improved and Marjorie Wilson had the misfortune to hurt her hip but was improved. The members were sorry to learn that Mrs. Day was ill. Sympathy was extended to Mrs. Oliver in the loss of her brother from an accident.

The meeting was then adjourned and a delicious lunch served by the hostess and helper. The next gathering will be on picnic day—July 22—at Mr. and Mrs. J. C. Buckley's grove.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Bill Dankwerth of Craigantler is hitting the high spots with his new Ford.

The C.P.R. ditchriders have not been boosting irrigation so much the last two years. The man above has taken things in hand.

The annual Indian Treaty took place at Cluny on Tuesday and in Gleichen on Wednesday. This event has always taken place in the fall after threshing is over, but has been changed to midsummer at the request of the older Indians who claim that they are not always able to get out to this important event in the cold weather.

Mr. Forsythe has build a large addition to his restaurant in Cluny. Luey Hong of Cluny is spreading out and is building an addition to his first class restaurant.

Jack Young has included several incorrigible horses in the carload sent to Medicine Hat stamped by McHugh Bros.

A heavy hail storm struck north of town Tuesday night, at about 10 p.m. and did considerable damage to crops. Among those whom it is rumored are either partially or wholly hailed out are D. Gillespie, Wm. Walsh, Mr. Hutcheson, H. Prestwick, J. Rouchee, Messrs Warner and Buckley.

Mrs. L. Bulley of Quebec is visiting her son and daughter at their farm near Ouelletteville.

The annual Orangemen's parade was held to the Union Church on Sunday night last.

Little patches have been sewn on the main street sidewalks this week in the shape of repairs. They look horrible. They are horrible!

Reflectors on automobiles are not by any means new devices, but one of those told some queer tales on a bunch of Cluny young people riding in the back seat of an auto last week.

Anywhere from \$5 for a home run, \$1 for a pitch out and two bits for a base hit was paid at the ball game on Tuesday between the Queenstown Juniors and the Gleichen public school team. It is somewhat to be regretted that the cloakies paid the boys for good plays. Let the boys play for the sport and the sport alone.

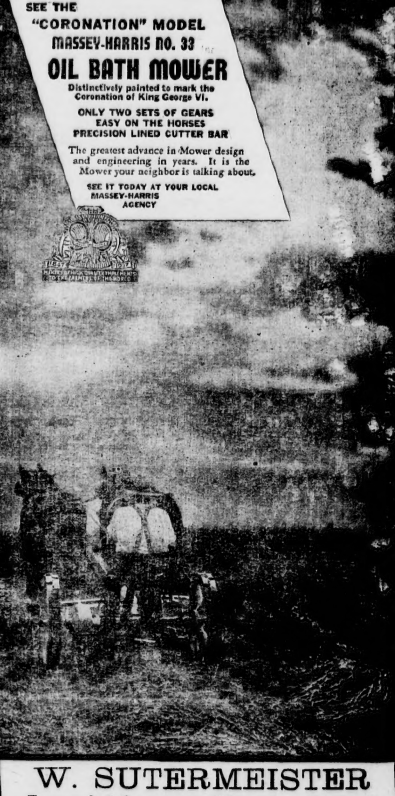

L. Michael, the newly appointed town tinsmith, reports a glorious business, but he still has time to erect anything from a tin dipper to a dread nothing.

It is reported on good authority that a member of the Provincial police will shortly be stationed in town. All jobs should be turned over to the editor for safe keeping.

While operating a caterpillar engine on his farm south of town E. Dolen had the misfortune to slip falling into the cogs of the wheels. His left arm was so badly lacerated that it was feared for a time it would have to be amputated.

Gleichen baseball boys ran into hard luck the other day when they bucked up against Stately and came out second best with a score 10-3.

## Government By Commission

It is not perhaps surprising that organizations and individuals are inclined to look askance at what has been termed the "rising tide of bureaucracy" as represented in the growing tendency to hand over the reins of governmental administration to appointed boards and commissions.

That there is a growing trend in this direction, both in the Federal and provincial areas in Canada cannot be gainsaid. The evidence is palpable. One only has to look around and enumerate, for proof that a multiplicity of boards and commissions are at work performing, in some cases the functions of governments, and in others, the duties formerly delegated to the courts. And the tendency is towards increased growth of administration in this form.

Apart from the question of expediency, there are, of course, arguments advanced in support of administrative government by appointed commissions and boards and some of these arguments are not without foundation. For instance, it is urged with a good deal of truth that demands by the people upon their governments for extension of existing services and new services is increasing all the time, and that these services can be rendered with greater expedition and more efficiency by boards set up for the purpose than by governmental departments.

The argument cannot very well be refuted, but the question which the people have to face is whether or not they are willing to surrender a good many privileges, such as the principle of governmental responsibility to the electorate, the right of appeal against decisions and the right to know what is going on, for the sake of greater efficiency.

That these privileges—or should one call them rights?—are impaired and threatened to an increasing degree with the multiplication of administrative boards and commissions was recognized at the recent convention of the Law Society of Saskatchewan, when delegates approved a committee report pointing out some of the principal objections to administration by commission and demanding that the commission continue its work and further, supported a proposal that a program of education which would bring the facts and the problem to the attention of the public be conducted.

One of the chief objections to commission form of administration is the fact that arbitrary powers are usually vested in organizations which are not directly responsible to the electorate and very often there is no appeal to the courts from the dictates and rulings of these bodies. In other words, the individual, deprived of recourse to the courts in which he has every confidence, has no power to obtain redress. That is to say, one of the fundamental rights of the individual is longer safeguarded to that extent.

Another objection, and this was stressed by the Law Society committee, is the fact that these appointed tribunals frequently conduct their hearings in secrecy, with press and public excluded, and coupled with that is the fact that reasons for decisions are not usually given. Under these circumstances, it is not surprising that the committee decided that "the comparative secrecy of the hearing tends to destroy confidence."

When rulings and decisions, binding upon the public, are given behind closed doors and without any accompanying reason therefor, it is to be expected that public confidence in tribunals that carry on their work in this manner will not be very strong.

On the other hand it may well be pointed out that frequently enough the wheels of justice operating through the established channels of the law courts travel slowly and, to the layman, it appears that the processes involved often entail unnecessary expense, possibly because of slow motion and the necessity of traversing a road bordered by a good deal of red tape.

No one in this country would wish to support the informality, sometimes bordering on indignity, which marks the administration of justice in some of the courts on the other side of the international boundary, but if measures can be adopted here which would simplify procedure and reduce its costliness without robbing the courts of their legal dignity and the dignity and respect in which they are properly held, they would be generally welcomed.

It is to the credit of the barristers attending the Saskatchewan convention that some recognition was given to this phase of the general question. The very fact that these lawyers themselves recognize the advisability of modifying procedure and reducing expense to suit present day circumstances and conditions is encouraging.

### Relief Frauds

#### A Little Bit Of Reason Is Necessary In All Things

There are still thousands of deserving people on relief. It would also look as if there are still some others who are imposing on the taxpayers. A case that apparently belongs in the latter category was revealed in police court. A Toronto resident was sentenced to seven days in jail and fined \$20 or seven days and had his driving permit cancelled on a reckless driving charge. An additional fine of \$10 or 10 days was imposed on him for failing to return to the scene of an accident in which another car had been damaged to the extent of \$36.

The evidence was that the accused had been drinking. His counsel stated that he is not working and is on relief.

What those who are paying the relief bills will want to know is how it is that a relief recipient has the money to own and drive a car, buy a driving permit and pay for gasoline and buy whiskey if he is really an indigent.—Toronto Telegram.

### Luck Ran In Threes

#### Guelph Couple Travel In Prize Car With Prize Money

Mr. and Mrs. Lyle O'Neill of Guelph, Ontario, went to the Maritimes in a new car on their honeymoon trip, all of which came about because luck evidently runs in threes for the groom.

A graduate of Ontario Agricultural College, O'Neill won a car in a contest. Just before the wedding day, he won a \$1,000 cheque in a honeymoon contest.

Then came a bit of hard luck when the new car was damaged when another car ran into it while it was parked on a Guelph street. This was nullified quickly, however, by a third bit of good luck when the insurance company gave O'Neill another new car to replace the damaged machine.

Astronomers have learned most of the important secrets of the sun at times when the sun was invisible during eclipse.

Remains of granite in seven colors are being laid in England.

Postmen of Britain are demanding tailor-made uniforms.

### For Green Pastures

#### Much Attention Being Devoted The World Over To Grassland Problems

Although during the present generation, wheat has held the stage in the public eye as the most spectacular agricultural crop, there is a much older and important crop on which agriculture itself was founded in the dawn of civilization. This is the grassland or pasture crop. For many years, it was relegated into the background until agricultural science came to its aid by adding much to human knowledge (and profit to the farmer) in relation to grassland, its creation, management and fertilization.

Never before has there been so much interest all over the world in grassland problems, or so much attention devoted to research work along the lines of plant breeding to improve the different forage grasses and legumes, the nutritive value of the various forage crops in livestock feeding, the improvement of grassland by the use of fertilizers, pasture management, and the study of the best seed mixtures for hay and pasture purposes.

Recently scientists of the Dominion, Ontario, and Quebec Departments of Agriculture, together with those of the various agricultural colleges, held a two-day session of the Dominion-Provincial Pasture Conference at the Central Experimental Farm, Ottawa, where the main phases of cultivation and utilization of pasture lands were discussed, and this month representative agricultural scientists will assemble for the world's Fourth International Grassland Conference at the Welsh Plant Breeding Station at Aberystwyth, Wales, chosen because the work accomplished there is internationally known. It is expected much benefit to all countries will be derived from the discussions during the meetings.

Canada will be represented by Dr. L. E. Kirk, the Dominion Agronomist, who will deliver the plenary paper for the Dominion under the title of "The Valuation of Some Species of Grasses and Legumes for Pasture and Fodder." The only other Canadian representative, Dr. MacConkey of the Canadian Research Council, will give a paper "Nutritional Aspects of Forage Crop Production in Eastern Canada."

### Investigate Arctic Regions

#### Canadian, U.S. and British Scientists To Conduct Studies

Distinguished scientists from United States and Great Britain this summer will conduct investigations in the Canadian Arctic regions. Dr. Charles Cammell, commissioner of the Northwest Territories council, announced names of scientists and explorers granted licenses to conduct studies within the Territories.

Carnegie Museum, Pittsburgh, will be represented by Arthur C. Twomey and J. Kenneth Douth. Commander Donald B. MacMillan is heading the British-MacMillan Arctic expedition. Charles E. Gilliam represents Iowa State College, Ames, Iowa, and the United States biological survey. Harry Snyder will be in the north sponsored by the National Museum of Canada and the American Museum of Natural History. Dr. G. Crile will be from the Cleveland Museum of Natural History, Cleveland, Ohio.

The Royal Geographical Society of Great Britain is sending David Haig-Thomas, John Wright, Richard A. Hamilton and is co-operating with St. John's College, Cambridge, in sending J. M. Wordie.

The Geographical Society has seven representatives who spent last winter in the north. They are T. H. Manning, Patrick D. Baird, R. Pilkington, G. W. Rowley, R. J. O. Bray, P. Bennett and Robert Benham.

The Canadian government is sending an unusually large number of surveyors and other classes of scientists into the north, most of them on the Naacope. The east Arctic patrol, as this expedition is called, is commanded by Major D. L. McKend.

### The Careful British

#### No Damage Done To Parks By Coronation Crowds

"What an orderly people!" With all the crowds, the celebration and what not, the Rt. Hon. Commissioner of Works in the British House announced that no damage had been done to flowers or flower beds in the great London parks during the Coronation. And contrary to another great European capital, there were no "verboten" signs put up. You have to take your hat off to people en masse like the British.

Cable says an Italian doctor has perfected a machine to take the pulse by radio. Television is needed, however, before the physician can also examine your tongue.

Chewing Tobacco

### New Secret Of Longevity

#### Brigadier-General Says Wear Suspenders To Keep Fit

It is pleasing to find a variation in the prescriptions for good health at great age. Too much they have been limited to long walks, total abstinence, regular drinking and the like. Brigadier-General Samuel E. Tiltman, who will be 90 in October, astonished the ship news reporters the other day by attributing his fine physical condition to the fact that he has never supported his trousers with a belt. Suspenders are his secret now revealed by a man who has gained distinction as soldier, astronomer, chemist and geologist.

There is much to say for the Tiltman theory. Suspenders may be ugly while belts are aesthetically, but the old galleuses put the weight of the breeches on the shoulders and not on the hips. Put a belt on a man and he will automatically throw his punch out to keep the leather from slipping. Give him suspenders and he can put his chest out and his tummy in without fear and social disaster. There is also the element of congestion of the abdominal capillaries under pressure of the belt.

Suspenders went out when the vogue for country life made men try to be beautiful sans coat and waistcoat. They are coming back now and General Tiltman's certificate will give them another fillip. If a man can not have two cars in his garage he can express prosperity by having suspenders for each and every pair of trousers.—New York Sun.

### SELECTED RECIPES

**RHUBARB PICKLE**

1 qt. rhubarb, cut fine  
1 qt. onions, chopped  
1 pt. vinegar  
2 cups brown sugar  
2 cups Crown Brand Corn Syrup  
1 tablespoon salt  
1 teaspoon cinnamon  
1/2 teaspoon cloves  
1 teaspoon allspice  
1/4 teaspoon cayenne pepper  
1/4 teaspoon paprika  
1/2 teaspoon Tabasco sauce

Method: Cut rhubarb fine; put onion through food chopper. Combine all ingredients together and simmer gently until rhubarb is tender. Seal hot in sterile jars. Makes eight pints.

### Drouth Hits Mars

#### Astronomers See Signs Of Arid Conditions In Equatorial Area

The planet Mars is having a drouth worse than any in the midwest dust bowl and the African Sahara.

The telescopic story of the drouth was reported to the American Association for the Advancement of Science by two Mt. Wilson astronomers, Dr. Walter S. Adams and Theodore Dunham, Jr.

This drouth was observed in the equatorial regions, the area where dark spots that astronomers suspect is vegetation, appear in summer.

It is the area fed by the canals of Mars. Judging by this report there is no doubt Martians use irrigation, if what astronomers see is vegetation.

### Money Found By Boys

Small boys playing "bank" with pound notes attracted the attention of Glasgow police. Investigation showed the boys had found the notes in a black tin box in an abandoned house. Besides £330 in English notes, there was an amount of German and Dutch money. The English notes were the dates of the Great War years.

Expert girls earn from \$40 to \$80 a week in one London factory where the best quality fur coats and scarfs are made.

There are 8,160 miles of railways in the state of California.

### Better Commission Programs

#### Extension Of Programme Period Forecast In Announcement

Extension of the daily programme period to 12 and possibly to 15 hours in October when the new high power transmitters in Ontario, Quebec and British Columbia will go into action, and the formation of light opera companies in Montreal and Toronto, were some of the announcements made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, following a meeting of regional directors and programme directors.

Grand opera concerts from United States will be continued, the general manager said, but it was felt that Canadian light opera talent existed to a sufficient degree to warrant formation of two companies which will give a series of 26 concerts, 13 from Montreal and 13 from Toronto.

Historical dramatizations and sketches based upon the activities of the Royal Canadian Mounted Police and other features representative of Canadian life, will be presented, with musical programmes originating in principal cities from coast to coast.

Of interest to western Canada was Major Murray's announcement that United States programmes will be brought in from Pacific coast stations to avoid the time inconvenience to western listeners when these broadcasts are brought in from eastern stations.

### There Is A Difference

#### People Can Boo But Not Hoot At Soap Box Orators

You can boo soap box orators in streets of Willesden, Middlesex, England, but you can't hoot at them. What's the difference? A police inspector explained: "Hooting is loud in volume, drowns the voice of the speaker, and can be heard by people living in the neighborhood for 100 yards." He added you could hear the orators' voices above hooting.

A seaplane can rise from slightly rough water more easily than from a calm surface.

The English actor, Sir Henry Irving, was born on Feb. 6, 1838.

Seal hot in sterile jars. Makes eight pints.

**Don't Let Foods Stale**

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

LUKE'S LAUNDRY

LAUNDRY WORK. CLEANING AND PRESSING. REPAIRING DRY CLEANING A SPECIALTY

What is ice cream? For several years, considerable difference of opinion has existed as to what ingredients constituted ice cream. However, the matter is now settled. Ice cream, its manufacture, packaging, sale and storage are now embodied in the Dairy Industry Act and are subject to new regulations under that Act, as amended by Order in Council, May 20, 1937. Any ice cream, ice cream cakes, chocolate ice cream bars, ice cream moulded into special shapes or any other ice cream specialty or novelty of which ice cream is a part cannot be sold in Canada unless the ice cream so used complies with standards for ice cream as defined by the Act. Needless to say, all ice cream in Canada is subject to inspection by officers of the Dairy and Cold Storage Branch of the Dominion Department of Agriculture, and all packages of ice cream must be clearly marked with a true and accurate

statement of the net contents and the name of the manufacturer.

## Town & District

Miss M. McLeod nurse at the Indian hospital has returned to work from her holidays.

Miss E. Bogie of Turner Valley is at present in town visiting at the home of Mr. and Mrs. Eli Woods.

Miss Connie Brenner of Nanaimo and Miss Marie Lumsden of Didsbury have been visiting with Miss E. Goodrich.

Miss Lynette Eason is home at present on her summer vacation visiting her mother, Mrs. Smith. Miss Eason teaches school at Thelma.

Mayor N. T. Purcell is now in Nova Scotia on a short holiday. Frank Woods is in charge of Mr. Purcell's store during his absence.

James Black, manager of the Bank of Commerce is giving his family a real treat this year. Mr. Black plans to take them to camp for a few days on the banks of the Bow River. Fishing and swimming are said to be on the order papers, so a grand time is assured.

Mrs. Don Bond, captain, and Miss Percy Yates, lieutenant, left Sunday to represent the First Gleichen Guide Troop, at the instructors camp which is to be held at Sarcee Camp. This camp is held annually for leaders, initiate them into the proper way to conduct camp life among the young girls. Shortly after their return Mrs. and Miss Yates plan to take the Gleichen troop for a week's holiday camping under the stars.

With haying in progress on many farms the following letter regarding mowers written by Jacob Bolinger and addressed to the Massey-Harris Co. Ltd., is of interest. "I am an experienced farmer of over sixty years of age and have always cut lots of hay since I was a boy. I never ran a machine that pulled as light and did the work as easily as my new No. 33 Massey-Harris Oil Bath Mower. I can stop and start without backing up in the heaviest grass I have tried to cut. It is the easiest on a team of any machine I ever ran. I also find adjustments very easily made in every respect. I can thoroughly recommend the machine to anyone who has lots of cutting to do."

### BOTANICAL NOTES FOR JULY

One day in July is enough for memory to be enriched forever if only with the sight of summer flowers as seen in contrast with their natural surroundings of water, grass, foliage and sky.

Everything, whatsoever, of beauty is seen at its best by virtue of contrasting surroundings. A precious gem to perfection only in its setting.

At this season of the year a most restful ball in nature appears to take place. Even the hills, he waiting to receive the shadows of the clouds that slip, like birds, from shoulder to shoulder. These clouds, like everything else have a great richness this month, so proudly filled with white light that they quiver with intensity, throwing paths of ghostly radiance on the water that is blue, here and there suffled darkly like tarnish silver—a reflection of contrast, superbly exquisite!

The woods are in their prime, but before the end of the month—alas! there will be signs that nature is on the wane. Several of the spring plants that had struggled after blossoming, soon wither under the influence of a hot sun; but not so these fortunate ones which bloom later and are borne in marshy places, ponds and streams.

A lover of damp places is the gorgeous purple honesty, of European origin, with its brilliant spikes of large magenta flowers. A very attractive and beautiful plant as well as most interesting, because through Darwin's study it has assumed an important place in his theoretical origin of species.

In July, cultivated plant life is in its zenith or at the peak of perfection but here again this galaxy of bloom is seen at its best only by virtue of contrasting surroundings whether they be well-kept grass, fence, wall or hedge.

There is much to be seen and marvelled at in the introduction of choice new varieties of flowers especially when seen against a suitable background or framework.

At the Central Experimental Farm there is a famous collection of hedges. Many species of trees, both deciduous and evergreen, also shrubs have been trained and clipped into rows of infinitely trim hedges. Great forest trees such as pine, hemlock, larch, oak, beech, birch, elm and linden are apparently quite contented to become hedges in the merciful adjustment which nature makes when what cannot be cured must be endured.

## Rely on U.G.G. Twine

You can rely on U. G. G. Binder Twine just as you can rely on United Grain Growers to give you good service. From long experience farmers all over the west have learned that U. G. G. Twine is of the highest quality. The price is the lowest practicable for good twine, and twine will be ready for delivery when needed.

Let your U. G. G. Agent know that you want U. G. G. Twine, so your supply can be ready for you.

## UNITED GRAIN GROWERS LTD.

Elevators at: Gleichen, Arrowwood, Shouldice, Cluny, Namaka.

## The Call Says

Think what this wonderful offer will mean in enjoyment throughout the whole year for yourself and your family. Magazines of your own choice and this newspaper, packed with stories, timely articles, helpful departments and colorful illustrations. Now is your chance.

Some people never hand in an item of news for publication, but if we happen to miss an item in which they are interested they are sure to hand us a north pole stare that would freeze the liver of a polar bear.

Who remembers when good ladies tried to reform old seaks by getting them to sign the pledge? From London to New York City and back would mark the length of London's water mains if placed end to end.
